🧠 Skills

Frontend

JavaScript ES6+ TypeScript, React, ReactNative, Redux, Context API, React Query, Ionic, JQuery, D3.js, Leaflet.js, HTML, CSS, Bootstrap

Tools

Firebase, Figma, Xcode, Android Studio, GitHub, AWS, Jira, RESTFUL API, Mapbox, Google Maps, Docker, CI/CD, Webpack, Babel

Database

MySQL, Realm Database, Firebase, SQLite, Mongo DB(Mongoose)

Backend

Java, SpringBoot, MVC, SpringMVC, Hibernate, Servlet, JSP, JSTL

📁 Professional Experience

Software Developer, Relyon Softtech LTD

July 2020 – July 2022 | IN

- Built **cross-platform application** for billing a payroll, boosting engagement by 40% and customer satisfaction by 25%.
- Implemented **Client-side state management, caching, lazy loading**, and other crucial mechanisms to improve real-time data synchronization, resulting in a 35% reduction in server load and a 45% improvement in website speed.
- Pioneered the adoption of a **micro-frontend architecture** and integrated **Storybook** for UI component development.
- Utilized **Realm Database** to maintain mobile app functionality in **offline mode**, ensuring data synchronization and seamless user experience during connectivity loss.
- Reduced server-client latency by minimizing the key-value terms by 30% while maintaining a lossless JSON structure.

Technologies: React and React-Native, TypeScript, Cross-Platform applications, API Integration and Optimization

Hybrid Application Developer, 3E Software Solutions

May 2018 – July 2020 | IN

- Spearheaded intrusive web application development for diverse industries, integrating **Firebase for real-time push notification** features and language translation, now integral to Defacto's suite.
- Integrated **Google Analytics** and Firebase Analytics for tracking user behavior, leading to data-driven enhancements and a 25% increase in user engagement.
- Implemented effective caching rules with a combination of **in-memory, browser and CDN techniques** to reduce server load from ~160/sec to ~20/sec.
- Successfully revamped multiple mobile applications, implementing modern design principles and **responsive layouts**.
- Successfully published multiple applications on the **App Store and Google Play Store**.

Technologies: React-Native, Ionic, Code Migration and Back Support, Figma, Application Optimization.

📁 Projects

Mind Pyramid, Sound to your meditation ✍

February 2024 – April 2024

- Developed a native app to promote and help with guided meditation, providing users with a calming and immersive experience with podcasts, customizable timers, and serene audiovisuals addressing mental health and sleep issues.
- Integrated a self-productivity tracker to encourage habit-building and goal achievement.

Technologies: React Native(Expo), Context API, Video Streaming, Material UI, Google Cloud console.

Civic-Guardian, Emergency Route Planning Tool ✍

September 2023 – October 2023

- Developed a cross-platform application to demonstrate a use case of Floyd Warshall's algorithm in real-world navigation by enhancing **Google Maps** routes for efficient decision-making and reducing end-user decision fatigue.
- Customized the Floyd Warshall algorithm where the obvious shortest path is manipulated with heuristics from historic traffic weights to derive better alternative paths.

Technologies: React Native, Webpack, Google APIs, D3js, Python

🎓 Education

California State University, Fullerton,

Master of Science in Computer Science

August 2022 – May 2024 | United States

Rajiv Gandhi Proudhyogiki Vishwavidyalaya,

Bachelor of Engineering

August 2014 – May 2018 | India
